Electric

Catch the power wave!

Our new lithium boards take electric skateboarding to a whole new level. We are proud to offer you a full range of products for all riders. The Skatey 150L is our completely redesigned model for kids and young riders. This board handles easy and offers hours of outdoor fun. The Skatey 350L is powered with an all new in-hub motor. This board suits a great range of riders. It offers everything you want in an electric skateboard at a very friendly price.

Skatey 150 Lithium

This board is great for kids and for riders under 60kg. It features a kick-tail longboard shape with no concave to the deck. The Skatey 150L is great for young riders who want to go around, its size is 80cm long and its weight is only 5kg. The board is very smooth and easy to drive.

The bluetooth remote is easy to use, features smooth acceleration, motor braking and two speed settings.

Electric

Catch the power wave!

The light weight and great riding features of our new electric skateboards allow you to take them anywhere. You can ride your board for fun of course, but you might even use it to bridge the last mile; riding from your bus stop to work. The Skatey 2800L and the Skatey 3200L both are easy to handle, have a great design and take you where you want to go with great ease. The 2800L has 2 in-hub motors in the rear wheels. The 3200L is powered with two aeromodelling motors.

Skatey 2800 Lithium

Skatey presents the 2800 Lithium with 2 x 1400 watts of on-demand dual brushless sensed motor power. The two in hub-motors are powerful, smooth and placed invisible in the rear wheels. This board is great for fun and it might even bridge your "last mile". The new remote gives you all needed data on your board and lets you handle it with ease. This board is pure fun!

Specifications

Topspeed: 30kmh
Range: up to 20km*
Weight incl battery: 9kg
Max load capacity: 100kg
Charge time: 2-4h
Battery: 5Ah, 2,24 Volt Lithium
Motor in-hub: 2 x 1400 Watt
Wheel: PU - black - 90mm
Dimensions: 91 x 23 x 14cm

Skatey 3200 Lithium

The 3200L combines great riding features with beautiful design. If you want to go fast and smooth, this is the board you are looking for. With the two 1600 watt engines on the rear axle the 3200L offers power and stability. This board gives you great mileage and recharges in only a few hours. The Skatey 3200L gets you around easily. The new remote reacts intuitively and gives you all riding details you need.

Specifications

Topspeed: 35kmh
